ABOUT ME

Driven by 7 years of classical music, Sound Design was my natural entry point into game development. During my university degree, however, I unlocked two other major passions: Game Design and Quality Assurance (QA). I love the process of building solid, engaging mechanics and crafting immersive audio, while applying the critical eye of QA to ensure a flawless final product. Beyond my technical skills, I am a strong communicator who deeply values loyalty, critical thinking, and a true commitment to the teams and projects I join.

SKILLS

- Good Communication
- Critical Thinking & Decision-Making
- Leadership & Team Motivation
- Reaper
- Fmod
- Git
- Jira

LANGUAGES

- **Portuguese** (native)
- **English** (advanced)

PROJECTS

Disasterpiece - 3D Physics-based Co-op Game 2025 - (in development)
Cooperative physics-based game about two thieves where the goal is to steal as many items as possible in each heist to accumulate wealth and expand your criminal empire. Im developing the roles of Producer, Game and Sound Designer.

Huddle - 3D Survival Arcade Game 2025
3D arcade survival game where you control a group of penguins that must deliver fish to a hungry queen. The goal is to survive as long as possible, managing the queen's hunger while fleeing from a relentless predator. In this project, I was Game Designer, Sound Designer, Producer, and QA Specialist.

Intempo - 2D platform and rhythm game 2024
A 2D platform and rhythm game set in a technological universe, where the player must overcome obstacles and challenges that move in perfect synchronisation with the beat of the music. I accumulated the roles of Producer and Level, Game and Sound Designer.

Hurrya - 2D Survival Top-Down Game 2024
A game that addresses the human impact of war through the journey of a boy searching for his family. I was in charge of Game, Sound and Level Design.

Ear Force One - Arcade Game 2024
Satirical arcade survival game based on the Donald Trump rally shooting. Focused on simple mechanics (sideways movement) and scoring. I did the sound design and game design for the game.

Other Projects

Av360 Horror 2024
Immersive 360° audio/video kidnapping mystery where player decisions matters to survive. I led the core concept, scriptwriting, and project logistics, coordinating all 360º equipment from video do audio.

Arduino Car 2025
This is an interactive digital driving experience, controlled by a handmade, Arduino-powered physical steering wheel, where I was responsible for the core concept and the entire "hardware" construction.

Unravel Sound Alike 2024
Completely rebuilt the audio for a 1-minute gameplay clip in Reaper, composing original music and creating all SFX and Foley from scratch.
